WINGERS DRIBBLING AND CONTROL

38-P3 | TECHNICAL

BETTER COACHES. BETTER PLAYERS.

ORGANISATION

- This simple technical practice focuses specifically on our wingers and developing their ability to dribble, take directional first touches and driving in possession.
- We set up our circuit using poles and cones in a 10-yard square area.
- To begin, one player starts by dribbling the ball between the poles before turning to play back to a teammate at the start station.
- The working player will pull off to receive the pass back, taking a directional first touch and driving around the cones.
- Finally, they will pass back to the teammate on the start station who will start their run through the circuit.

KEY COACHING POINTS SUMMARY

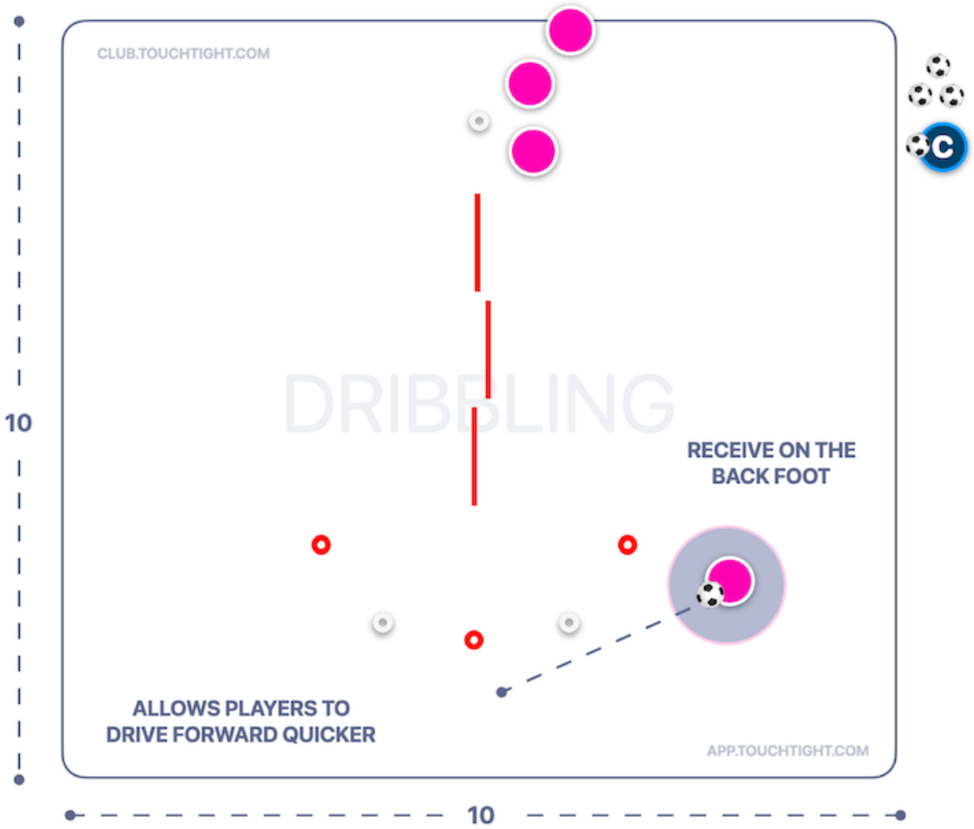

- Close control while dribbling
- Directional first touch when receiving
- Sharp turns and movement around the poles/cones
- Passing accuracy
- Communication when passing and receiving
- Dribble using both feet

WINGERS DRIBBLING AND CONTROL

38-P3 | TECHNICAL

KEY COACHING POINT

Receive on the back foot to create space and momentum, enabling players to drive forward quicker, improve transition speed, and maintain control while advancing the play.

PROGRESSION

Progress by having players drive on the inside of the cones, focusing on tight control, precise dribbling, spatial awareness, and first touch when receiving.

BETTER COACHES. BETTER PLAYERS.
