DEFENDING TO FORCE DIRECTION

59-P4 | SKILL

ORGANISATION

- This defending practice takes place in a 20 by 15-yard area with a mini goal positioned centrally on the end line and two small cone gates placed wide on either side.
- The coach begins each round by passing the ball into three attackers, who attempt to score while facing two defenders protecting the goals. Attackers can score in three different ways: Central mini goal = 3 points, Wide gates = 1 point each.
- If defenders win the ball or force the attackers out of play, they are awarded 2 points.
- After each round: The three attackers rotate out the two defenders stay in for two rounds before switching
- Ensure different defensive and attacking combinations rotate throughout the practice.

KEY COACHING POINTS SUMMARY

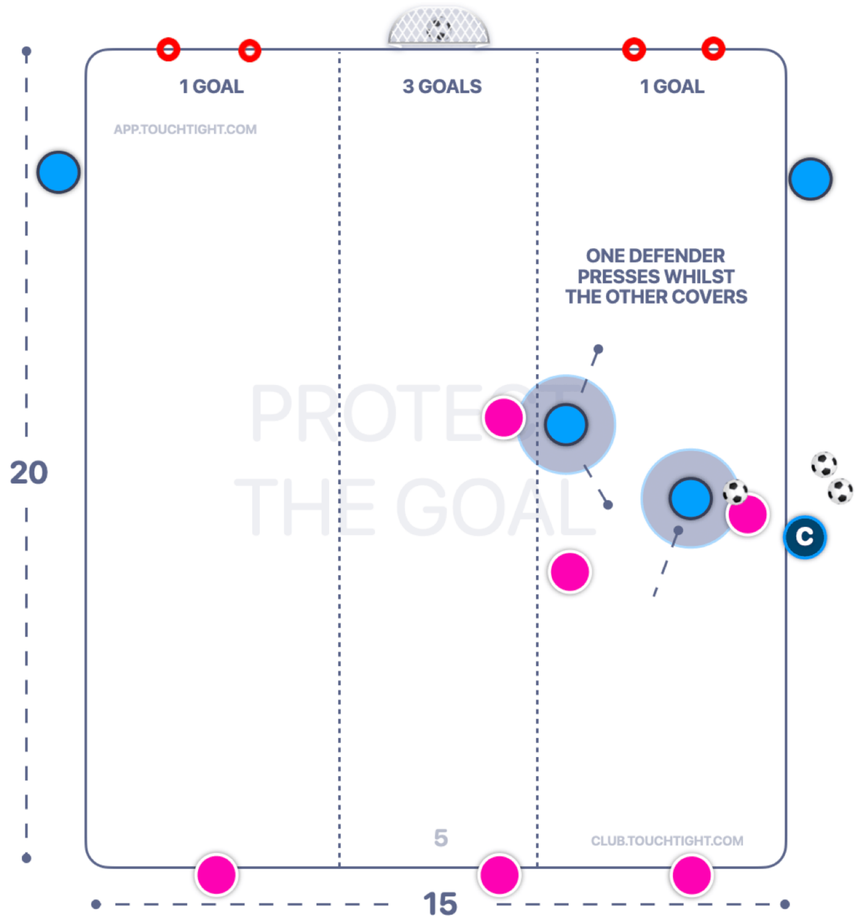

- Protect the central scoring area first
- Clear communication between defenders
- Decide who presses and who provides cover
- Stay compact to reduce passing lanes
- Force attackers away from the main goal
- Delay the attack rather than diving into tackles

DEFENDING TO FORCE DIRECTION

59-P4 | SKILL

KEY COACHING POINT

One defender presses while the other provides cover. They must work as a pair to reduce passing lanes, force play in one direction, and create better opportunities to win the ball.

PROGRESSION

Introduce transition to counter. Defenders can win the ball and now must look to play out to the target players on the outside of the areas - simulating playing out to full backs

BETTER COACHES. BETTER PLAYERS.
