Organisation
This advanced lead practice takes place in a 50 by 50-yard area and focuses on developing the defensive units compactness and ability to defend wide deliveries. We setup by splitting the area up into zones with players starting in these areas as show in the example image. The objective of this practice is for each attacking midfielder to touch the ball and the play into the striker, who can pass to the wingers or set the ball for the midfielder to play to the winger. As this is taking place, the two wingers and full backs (Red - 7 & 11 and Gold 2 & 3) will play one touch passes between them until the ball is played wide, triggering a 4 v 4 attack. The winger must beat their fullback and deliver the ball into the area to finish. If the fullback wins the ball, they must finish in the mini goal. If the two midfielders win the ball, they must finish in the mini goals. If the ball is won in the deep defensive area, this will trigger a 7 v 6 attack with the objective to build up and finish in either mini goal.

Key Coaching Points
1. Stay compact as a midfield pair - avoid penetration
2. Fullback must position themselves at the correct distances and body shape to win possession
3. Get goal and ball side when defending deliveries into the box
4. High levels of communication to stay compact as a unit
5. Passing quality to maintain possession
6. Quick reactions to ball played in by coach

Progressions
1. 1 extra defender can defend the box creating an 5 v 4 defensive overload

Player Questions
1. How well do you defend in 1 v 1's?
2. Why is positioning and communication so important when defending wide deliveries?
3. How quickly do you transition from defending to attacking?
