HOW TO DEAL WITH INCREASING PRESSURE

32-P6 | SMALL SIDED GAME

SMALL SIDED GAME

BETTER COACHES. BETTER PLAYERS.

ORGANISATION

- This small sided game takes place in a 20 by 20-yard area and focuses on players ability to maintain possession under increased pressure from defenders.
- This practice has a central 10 by 10-yard zone for players to keep possession with four mini goals placed on each side of the outer playing area.
- The team of 5 starting with possession, Pink in this example, play two touch to keep the ball away from the defender, Blue.
- After every successful two passes, an extra Blue defender may enter the zone looking to win back possession.
- When possession is won, the Blue team produces a quick finish in the closest of the four mini-goals.

KEY COACHING POINTS SUMMARY

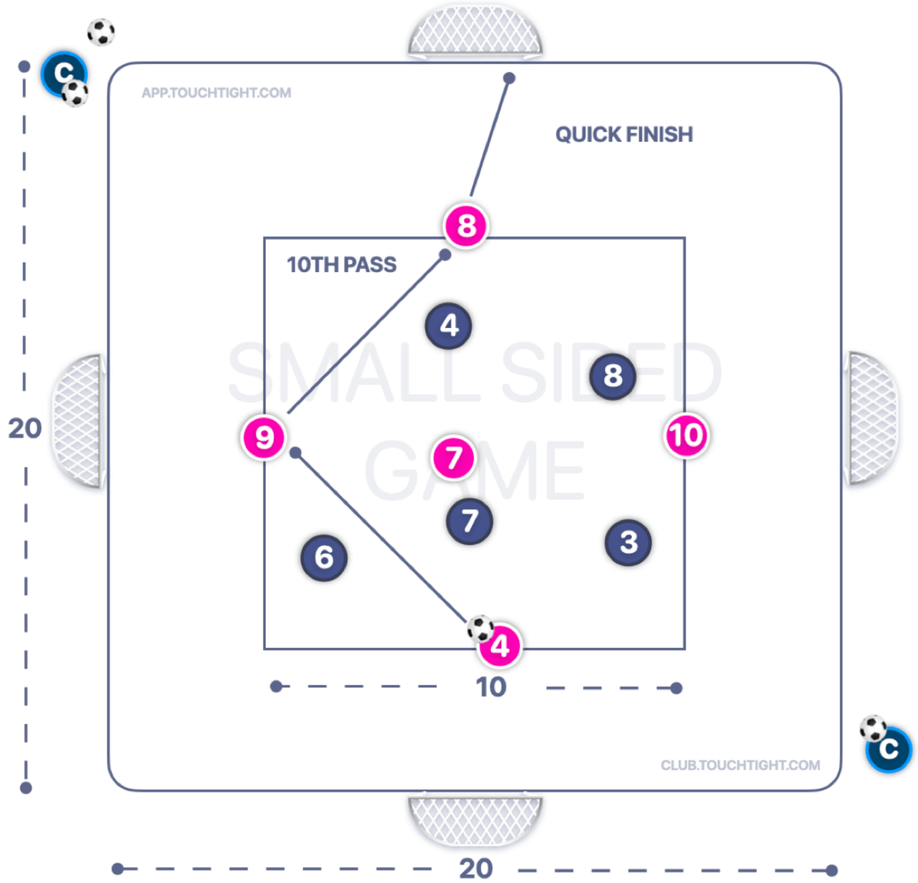

- Checking shoulders for defenders joining in from outside zone
- Passing tempo and accuracy
- Recognising how to move the ball under pressure
- Quick transitions when possession is won
- Connect with floater to play out of pressure situations
- Co-ordinated defensive press

HOW TO DEAL WITH INCREASING PRESSURE

32-P6 | SMALL SIDED GAME

PROGRESSION 1

After completing 10 successful passes, the team in possession can finish in the mini goals, rewarding patience and accuracy while motivating players to maintain focus and quality throughout the game.

PROGRESSION 2

After winning possession, the defending team must complete a single pass in the outside zone before finishing, improving decision-making, speed of play, and the quality of transitions under pressure.

BETTER COACHES. BETTER PLAYERS.
