POSSESSION TO PENETRATE

80-P5 | POSSESSION

BETTER COACHES. BETTER PLAYERS.

ORGANISATION

- This possession rondo take place in a 15 by 15-yard area and focuses on developing penetration.
- We setup by creating a central triangle (the penetration zone) in the centre of the area, with 6 possession players (Pink) up against 3 defenders (Blue).
- The objective for the possession team is to keep the ball, creating opportunities to play penetrating passes through the triangle zone, scoring a point for each successful pass through.
- Defenders cannot pass through the central zone when looking to defend.
- If the defenders win the ball, they must work to play 5 passes under pressure, scoring a goal if successful.

KEY COACHING POINTS SUMMARY

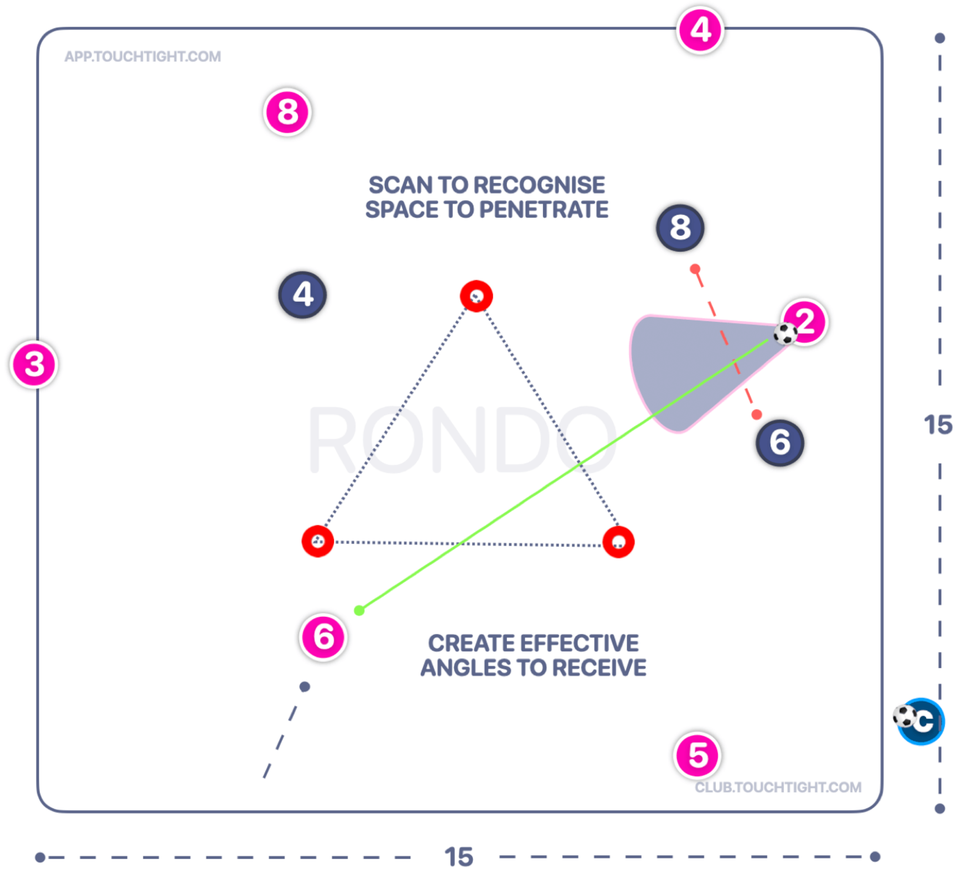

- Make use of the full area in possession - stretch the defenders
- Recognise opportunities to penetrate - scan to find gaps
- Increase pass speed when playing penetrating pass
- Quick transitions to press after loss of possession
- Create effective passing angles to help teammates in possession

POSSESSION TO PENETRATE

80-P5 | POSSESSION

KEY COACHING POINT

Scan early and often to recognise space and play penetrating passes through zones in possession, while creating effective angles to receive and support teammates at all times.

PROGRESSION

Add a connecting player in the central zone. If the team achieves a successful transfer of possession through this player, it counts as a goal, encouraging central connection, scanning, and quick decision-making.

BETTER COACHES. BETTER PLAYERS.
